**ERRATUM**

In my original comments in this proceeding filed with the Commission on May 7, 1993, an error is contained in the Executive Summary of the study entitled "Broadcasters' License Renewal Claims Regarding Children's Educational Programming." Paragraph 2 of the Executive Summary contains seven key findings produced by the study. The first of these seven points reads:

stations claimed to provide an average of 3.4 hours per day of programming

"specifically designed" to meet the educational needs of children;

The statement should report an average of 3.4 hours per week rather than per day. The correct finding of 3.4 hours per week for this statistic is correctly noted subsequently in the final paragraph of the Executive Summary. It is also presented correctly throughout all sections of the actual report, including text and tables.

I regret any inconvenience that may have been caused by this error.

Respectfully submitted,

Dale Kunkel
